

Project Name:**Social and Economic Issues - Canadian Arctic Islands Communities****Project Location:****Calgary, Alberta, Canada****Client(s):****Confidential****Date Completed:****October 2008****Project Budget:****N/A****Project Summary:**

Integrated Environments has undertaken a study of the regional and community profiles for the North Baffin Region and the Inuvialuit Settlement Region. The purpose of this project is to provide a briefing that outlines the present and historical context and issues that shape the fabric of the regions and communities in the North Baffin Region and the Inuvialuit Settlement Region.

Services Provided:

The regional and community profiles consists of the following components:

- * A broad overview of current social and economic issues;
- * A historical perspective that provides context to local issues and events;
- * An overall understanding of what the communities' needs and interests; and
- * An overall discussion on regional socio-economic perspectives and a comparison/contrast between the two territories.

Deliverables or Results:

- * Report entitled "Social and Economic Issues - Canadian Arctic Islands Communities"
