

Project Name:
Coalbed Methane: Developing Better Understandings of Best Management Practices

Project Location:	Alberta, Canada	<p>Coal Bed Methane Cross Section</p>
Client(s):	The Canadian Association of Petroleum Producers	
Date Completed:	May 2007	
Project Budget:	\$50,000	

Project Summary:

Integrated Environments was retained by CAPP to prepare and deliver presentations on a Best Management Practices document produced by CAPP for Coal Bed Methane (CBM) in Alberta. The purpose of the presentations was to increase awareness of the document so that it is used by land owners and industry field staff to understand available best practices and create more collaborative processes for resolving perceived conflict.

Services Provided:

- * Review of Best Management Practices document;
- * Preparation of presentation for public information sessions;
- * Consultation with CAPP members and Canadian Society for Unconventional Gas to seek input on presentation;
- * Presentation of public information sessions in communities affected by CBM development.

Deliverables or Results:

- * Delivery of public information sessions
