

Project Name:
Third Party Environmental Audit of the Camisea Gas Project, Peru

Project Location:	Camisea, Peru	
Client(s):	Inter-American Development Bank	
Date Completed:	2005	
Project Budget:	\$250 K	

Drilling Platform – Camisea, Peru

Project Summary:

The Camisea Gas Project is the first major gas project in the Peruvian Amazon, destined for the export market. As part of financing by the Inter-American Development Bank, IEL conducted an environmental audit of the project in association with Italy based D’Appolonia S.p.A.

The audit covered drilling and production facilities in the field, an export pipeline to the coast (about 550 km) and an export terminal.

Services Provided:

- * Site review of environmental and social compliance of pipeline construction and drilling operations
- * Review of project documentation
- * Socio-economic review and discussions with stakeholders
- * Project interviews of personnel and discussion of auditing findings
- * Presentation of audit results in formal reports

Deliverables or Results:

- * On-site review of auditing findings
- * Presentation of audit report
- * Review incorporating changes of lenders and project proponent
