

Project Name:
Collaborative Approaches and Strategies for Oil and Gas Impact Management

Project Location:	Northwest Territories, Canada	<p>The Mackenzie Valley</p>
Client(s):	Government of Canada; and Government of the Northwest Territories	
Date Completed:	2007	
Project Budget:	\$100,000	

Project Summary:

The federal and Territorial governments in the NWT were faced with significant growth and development issues in the Mackenzie Valley with growing oil and gas development and the application for a major pipeline project. With multiple stakeholders and significant development pressure, all parties in the region were asking for more collaborative approaches and strategies to work together.

Services Provided:

- * Review of Best Management Practices;
- * Preparation of presentations for public information sessions;
- * Consultation with industry, government and aboriginal communities;
- * Development of collaborative strategies for the parties; and
- * Development of an industry-government-community Task Team to address key issues.

Deliverables or Results:

- * Collaborative Strategies Report
- * Task Team structure
- * Task Team meetings
