

Project Name:
Supplementary Environmental and Social Impact Assessment and Environmental Management Plan for the Trung Son Hydropower Project

Project Location:	Trung Son commune, Quan Hoa district, Vietnam	
Client(s):	Trung Son Project Management Board (TSHPMB)	
Date Completed:	Ongoing	
Project Budget:	\$65,000	

Bamboo products on Ma River in project area

Project Summary:

The intent of this project is to address a number of issues required for World Bank financing appraisal for the Trung Son Hydropower Project (TSHPP), including the preparation of a Supplementary Environmental Impact Assessment (SESIA) and Environmental Management Plan (EMP) compliant with the World Bank’s Environmental Assessment (OP/BP 4.01) Policy.

The SESIA predicts potential biophysical and socio-economic effects which may result from the TSHPP and prescribes mitigation measures to ensure sustainable project development. The SESIA is designed to incorporate information collected from previous environmental and social studies conducted on behalf of the TSHPMB and highlight areas that require additional information and project planning.

The EMP identifies the principles, procedures and methods that will be used to control and minimize the environmental and social impacts of all construction and operational activities associated with project development. It is intended to complement the project SESIA and ensure that commitments made by the TSHPMB to minimize project related environmental and social impacts are upheld throughout all project phases.

Services Provided:

- * Review and integration of environmental site assessments, modeling and feasibility studies done by both local and international consultants
- * Development of a SESIA including an impact analysis and mitigation measures
- * Identification of information gaps
- * Development of an EMP
- * Participation in the public consultation process

Deliverables or Results:

- * Environmental and social information synthesis
- * Preparation of a SESIA document
- * Preparation of an EMP document
- * Presentation of the SESIA and EMP to the TSHPMB and the public
